

Assignment-4

Create a form component with fields for name, email, and message.

Index.js

```
import React from 'react';
import ReactDOM from 'react-dom';

function App(){
  return(
    <form>
      <label for="fname">Enter your name:</label>
      <input type='text' id="fname" placeholder="Fullname" name="Enter your
name:"></input>
      <br></br>
      <label for="fname">Enter your Emailid:</label>
      <input type='text' id="fname" placeholder="xyz@gmail.com" name="Enter your
email:"></input>
      <br></br>
      <label for="fname">Enter your message:</label>
      <input type='text' id="fname" placeholder="text here" name="Enter your
email:"></input>
      <br></br>
    </form>
  );
}

ReactDOM.render(
  <App/>,
  document.getElementById('root')
);
```

Index.html

```
<!DOCTYPE html>
<html lang="en">
<body>
  <div id="root"></div>

</body>
</html>
```

Output:

Run the command “npm start” to compile the code.

```
PROBLEMS  OUTPUT  DEBUG CONSOLE  TERMINAL

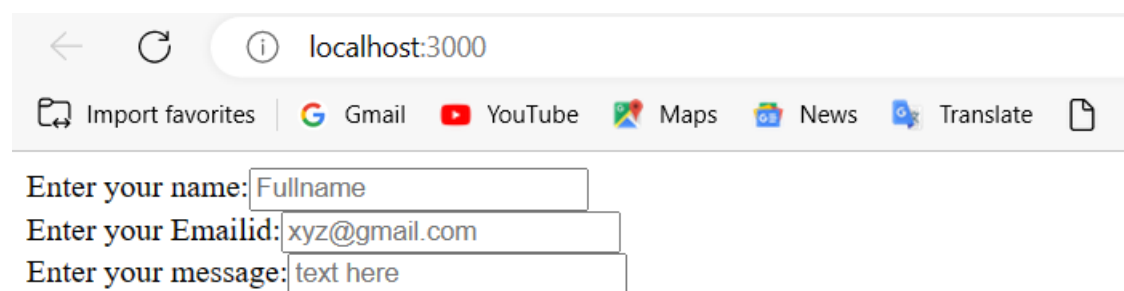

PS D:\s_internship\react files\myapp> npm start

> myapp@0.1.0 start
  Compiled successfully!

You can now view myapp in the browser.
  Local:            http://localhost:3000
  On Your Network:  http://192.168.145.67:3000

Note that the development build is not optimized.
To create a production build, use npm run build.

webpack compiled successfully
█
