Assignment-1

Create a "Hello, World!" application in React.js. Render a component that displays the message "Hello, World!" on the screen.

Source code:

React.js

```
import React from 'react';
import ReactDOM from 'react-dom';
const name="Hello, World!";
const element=<h1> {name} </h1>

ReactDOM.render(
  element,
  document.getElementById('root')
);
```

React.html

```
<!DOCTYPE html>
<html lang="en">
<body>
  <div id="root"></div>

</body>
</html>
```

Output:

Run the code using the command "npm start"

```
PROBLEMS    OUTPUT    DEBUG CONSOLE    TERMINAL

Compiled successfully!

You can now view myapp in the browser.

  Local:            http://localhost:3000
  On Your Network:  http://192.168.145.67:3000

Note that the development build is not optimized.
To create a production build, use npm run build.

webpack compiled successfully
```
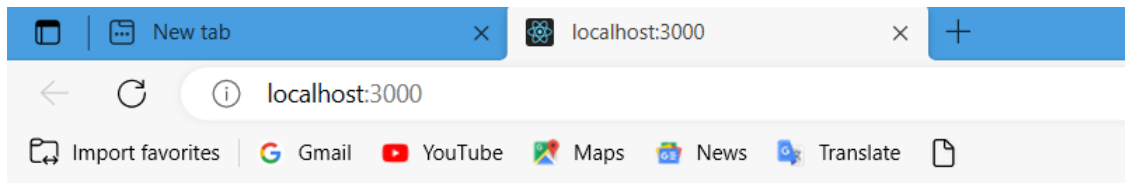

Hello, World!
